

Do not overturn the no call law in NJ. I have a right to privacy in my home. I have a right not to receive calls from telemarketers at 7am on Sunday, on average 4x during the dinner hour. My phoneline was unconnected to the phone for months until the law was passed. I want to have control over the calls made to me. If you undo this law, you will communicate to every American citizen that you belong to business, not to the people.
